

# VERTICAL GARDENS

*Let us help build a greener and  
better world for tomorrow!*  
***Do something GREEN today!***

# What are Vertical GARDENS?

- **Vertical Gardens are beautiful, space-saving and a sustainable addition to our cities.**
- **They are a wonderful alternative to potted plants.**
- **A garden in which the plants are supported to grow along vertical, often tiered surfaces, especially fences, posts, trellises, and walls, rather than along the ground.**
- **They are also known as Green Walls.**

## Why Vertical Gardens?

### **A solution for urban conditions**

Cities getting crowded means less garden space for all. However, this doesn't have to mean "No plants at all".

### **Environmental benefits**

They help to reduce the carbon footprint of a building by filtering pollutants and carbon dioxide out of the air, which also benefits those living nearby as the quality of the air is improved.

## Improves the work environment in office spaces

Greenery in an office or any interior environment has many advantages, but the one major advantage is the way you will feel after it is installed. Time after time, many studies have shown that plants have an enormous effect on improving mood in work environments.

## Keeping your diversity of plants

You can even experiment with growing diversity of plants like decorative and vegetable plants row by row to give aesthetic to the garden. Comparatively the Vertical Garden is easier to grow and maintain as well.

## Energy savings

Exterior wall Vertical Gardens also help to the reduce heat absorption, which can result in significant energy savings in areas where people rely on air-conditioning during the warmer parts of the year.

# Why SARYAM?

- *Help Saryam in our endeavour to make urban areas greener*
- *We provide ideal green walls for office spaces and apartments.*
- *Saryam designers can help you determine which areas of your business might benefit from a Vertical Garden. We can also help you determine which green wall solution would work best for you*
- *Most indoor Vertical Gardens from Saryam have a system that is easy to maintain.*

## For the Greater Good

*"our cities need more green spaces. not the colour green, but plant-life green. plants everywhere, growing on walls of car parks, inside office buildings, along laneways, on rooftops."*

- Vertical Gardens not only look great but they are extremely good for the environment, especially when they are installed in built up urban areas.
- They improve air quality
- Green walls cool the home
- Vertical Gardens save water

*If all spaces had more green, it would one step in the right direction, one step towards a better planet, one step towards a solution for climate crisis. Let us join hands and make this world better for future generations.*

S.NO	Description	Unit	Specification	
			Frame	Pot
1	Material		PP	PP
2	Grade		Flexi Rigid	Flexi Rigid
3	UV and Weather Proof		Yes	Yes
5	Component Weight	gms	197	120
6	Component '1 set'	No's	1	3
7	No Screws per set required	No's	4	-
8	Screw Size	mm	M5	-
9	Water Pipe suitable	mm	-	12
10	Max weight in 1 pot	kg	10	2
11	Mounting Frame		Optional	-
12	Colour of Frame and Pot		Black	Black
13	Temperature Resistant	Deg.	90	90
14	Maximum mounting set	mm	Continious	Continious
15	No. of pieces in one pack	nos.	-	-
